

SPRING 2021 PEER MENTORS

A **peer mentor** is like being a mini teacher; they are expected to have sufficient knowledge of the topics at hand and be able to satisfactorily answer the questions of peers. The peer mentor is someone who has taken the class already, and, as such, is usually one grade older than the students enrolled in the course. The mentor also can offer tips for studying and preparing for exams. Finally, mentors also know the ins and outs of how the professor grades, allowing for precise correction of projects and a clear understanding of what is expected from the students.
