# **SPSS 26 Installation Directions for Mac**

- Before you can run SPSS, you need to install the <u>OpenVPN client</u>. Directions to install OpenVPN on your computer or mobile device are available <u>here</u>. Once it is installed, start the OpenVPN client and log in so you can complete the SPSS installation successfully.
- 2. After you have connected through OpenVPN, login to the <u>online Shared Software</u> folder with your Lake Forest College email account (including the "mx," i.e., myusername@mx.lakeforest.edu).

Navigate to the **SPSS** folder, and click to open it. Click the file named **SS\_CLIENT\_26.0\_MAC\_OS\_MULTILINGUA.dmg**, and then the **Download** button.

Click the **back** button on your browser to return to the previous page. Click the file named **26.0-IM-S26STATC-Mac-FP001.dmg** and then the **download** button.

**Note:** Depending on your network speed, it may take a while for the files to download.

3. Gatekeeper needs to be turned off before installing SPSS. To see if it is turned on, open System Preferences.

4. Select Security & Privacy.

5. Select the **General tab**. If the **Anywhere** option is under **Allow apps downloaded from:** select it and go to step 10. If not, close the Security & Privacy window and continue with the next step.

- 6. Click the Magnifying Glass to open Spotlight Search.

   Image: Image: Image of the state of the
- 7. Open Terminal.

8. Type "sudo spctl --master-disable" without the quotes. Enter your Mac password. It will not show what you type as you enter your password.

9. Go back to General tab. The Anywhere option will be selected. You can now install SPSS.
