

Mathematica Installation Directions for Windows

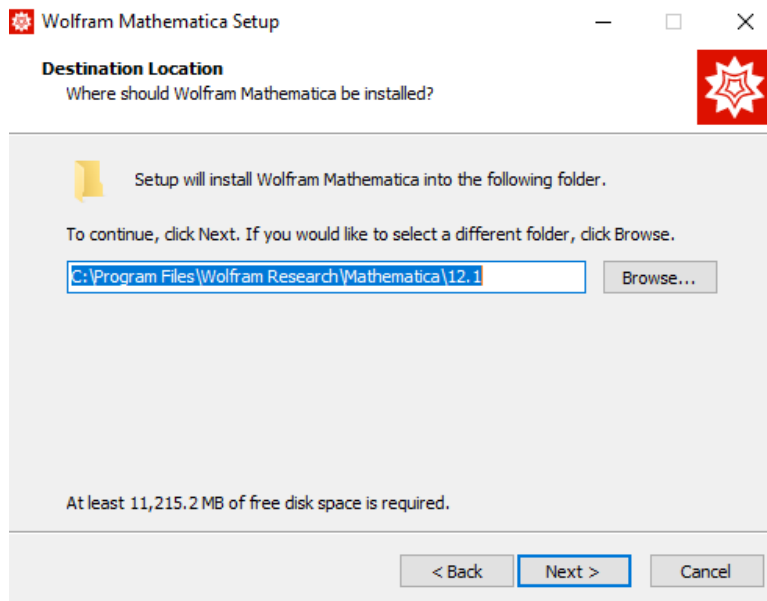

1. Before you can run Mathematica, you need to install the [OpenVPN client](#). Directions to install OpenVPN on your computer or mobile device are available [here](#). Once it is installed, start the OpenVPN client and log in so you can complete the Mathematica installation successfully.
2. After you have connected through OpenVPN, login to the [online Shared Software](#) folder with your Lake Forest College email account (including the “mx,” i.e., myusername@mx.lakeforest.edu).
3. Navigate to the **Mathematica** folder, and click to open it. Click the file named **Mathematica_12.1.1_WIN.zip**, and then the **Download** button.

Note: Depending on your network speed, it may take a while for the file to download.

4. Once the file has downloaded, navigate to the **Downloads** folder on your local hard drive. Find the **Mathematica_12.1.1_WIN.zip** file and double-click on it to begin the installation.
5. After running Setup.exe, you will be presented with the installer screen below. Click **Next**.

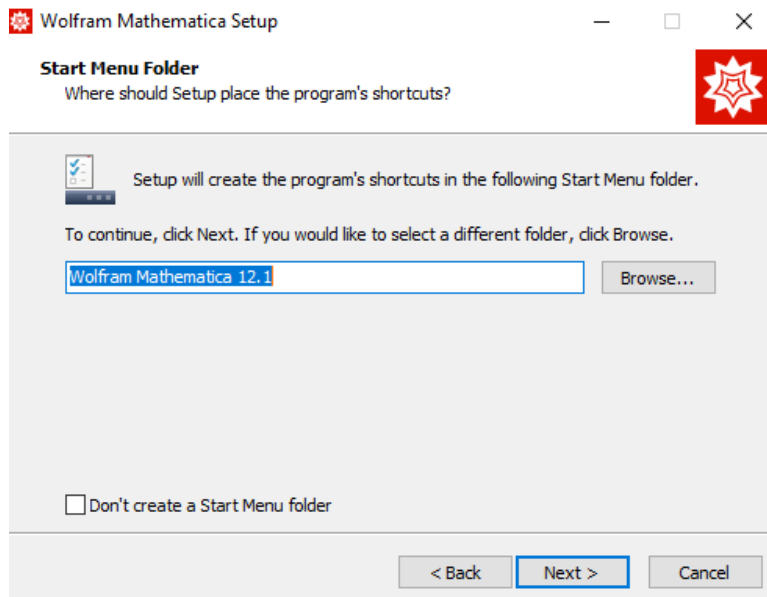

6. Click **Next**.

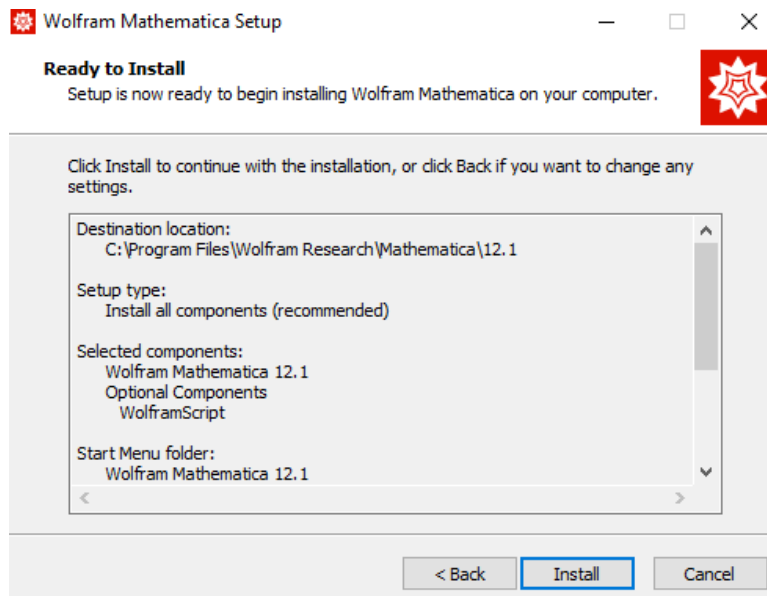

7. Click **Next**.

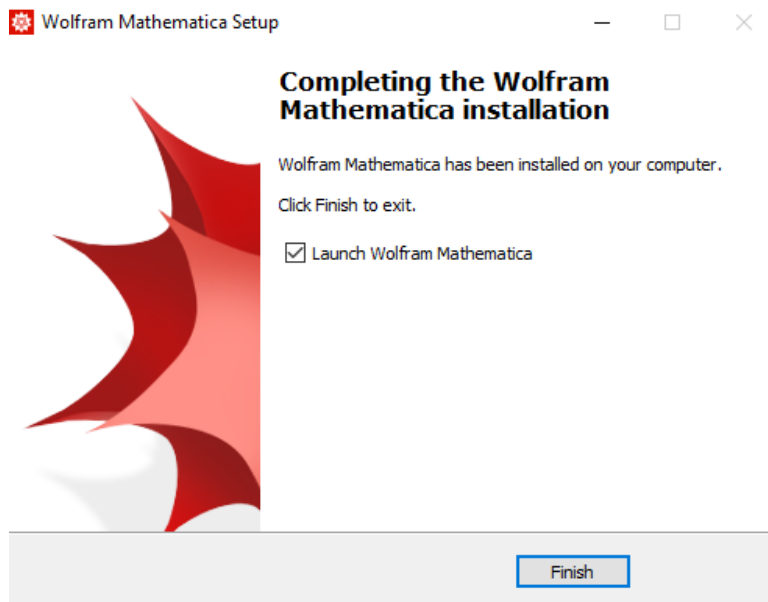

8. Click **Next**.

9. Click **Install**.

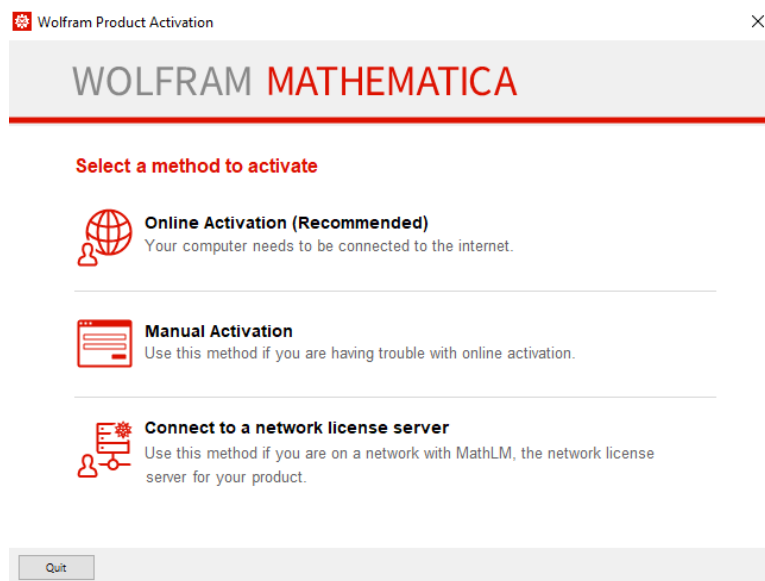

10. Click **Finish**.

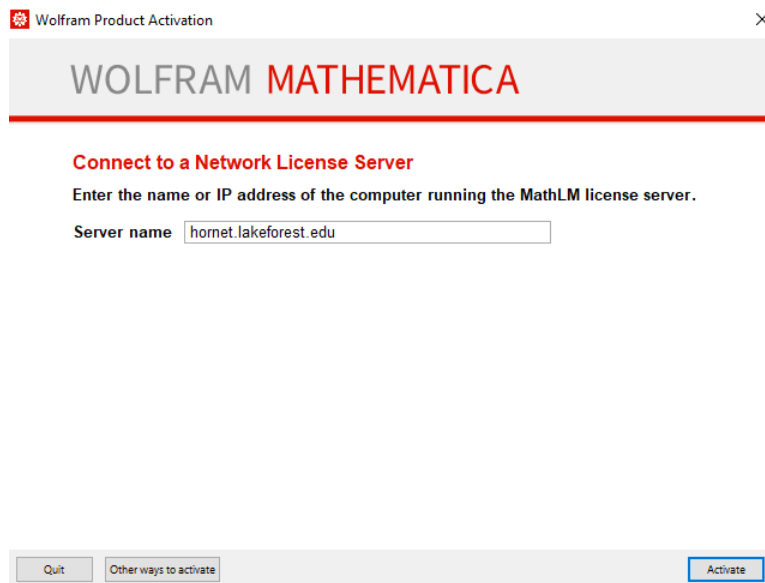

11. Select **Other ways to activate**.

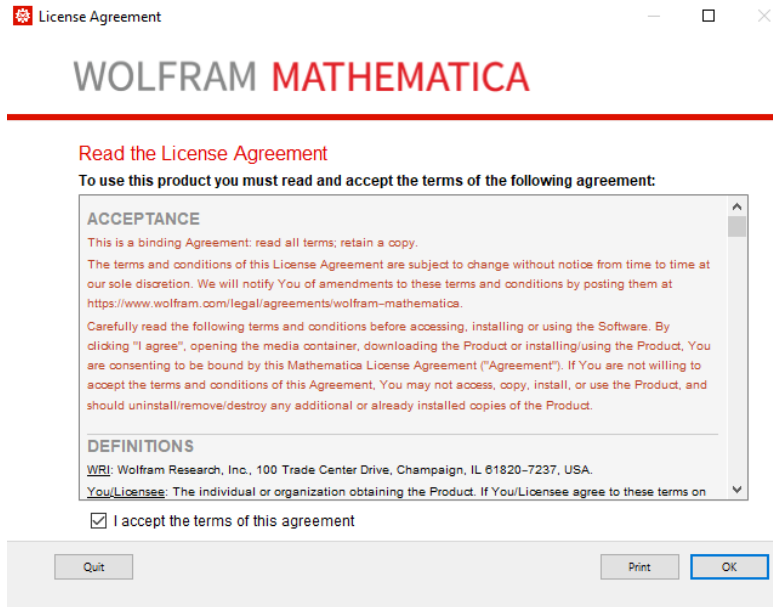

12. Select **Connect to a network license server**.

13. Enter **hornet.lakeforest.edu** in the **Server name** box.

14. Click the **I accept the terms of this agreement** box. Click **OK**.

15. Mathematica is ready to use.

16. You can now run Mathematica any time you are connected to the Lake Forest College network through VPN or on campus.

Note: When off campus, you must connect to OpenVPN before running Mathematica to have access to the licensing server.
